Subject:	Unsatisfactory Field Inspection No. 671100778
Date:	Thursday, January 30, 2014 3:47:00 PM

Susana,

The subject field inspection identifies a concrete produced water vault as being in unsatisfactory condition. Please submit for my review and approval either a plan to verify the integrity of that vault (e.g. evacuation of the vault, inspection of its walls and floor by COGCC staff, and hydrostatic testing with potable water) or a Form 27 detailing closure/removal activities and associated sampling to determine if the vault lost containment.

Please don't hesitate to contact me with any questions.

Thanks,

Chris
