Hi Arthur,

I just wanted to let you know as soon as possible that Bayswater sold this particular well to Synergy Resources as of December 15, 2014. The environmental contact for Synergy, Jerry Brian, is copied on this email and should be able to assist you with this request.

Please let me know if you have any questions regarding any Bayswater sites or need confirmation on the sale of this well.

Thank you,
Meagan

Subject: Wheeler/Bargen water well investigation section 33 1N 67W (Complaint # 200432026)

Meagan,

The Colorado Oil & Gas Conservation Commission (COGCC) is investigating the occurrence of dissolved thermogenic methane in two domestic water wells located in section 33 1N 67W (754014 – Wheeler 245188 and 754063-Bargen 6879). The COGCC believes the above-mentioned impacts may be the result of nearby oil & gas activities and are attempting to identify the source. Approximately 53 oil and gas wells occur within 1/2 of a mile of the subject water wells.

The COGCC is compiling information from companies conducting oil and gas operations in the vicinity. Attached is a list of the required information in the form of headings for an Excel spreadsheet for O&G wells Bayswater operates within 1/2 mile from the subject wells. Please provide your information by the close of business on 07/01/2015.

The COGCC is requesting information for the following Bayswater well(s):

05-123-07178 JACOBUCCI #3

If you have questions or comments, please contact me.

Thanks in advance for your attention to this matter.

Arthur
