Date: Wednesday, January 13, 2016 4:04:16 PM

Arthur,

Sorry but the comment did not get included with the sundry notice:

Explanation is:

There is only one available water source located within 0.5 miles of the proposed Gregory #5-09H production well location (Receipt No. 9118919). It was confirmed during attempted sampling activities that the windmill and pumping mechanism had been previously removed making the water well nonoperational. Water well (Receipt No. 9118919) is determined to be exempt from sampling requirements per COGCC Rule 609.b(5).

If you need any further assistance, please give me a call. Thanks

This email originates from an external source. Please be cautious before clicking on any links and/or opening any attachments.

John,

In order to approve the Sundry the COGCC requires a description of why a water well is unsuitable for sampling. The Sundry that was submitted for Gregory #5 stated that the one well within ½ mile was unsuitable but no description was provided.

Thanks,

Arthur
