Bob,
Crestone has our permission to enter the land and make the necessary improvements to this abandoned well. It looks like form the aerial it may be under our temporary dirt stock pile. You have permission to move that dirt to access the well. We will work with you to define an appropriate termination elevation and location for the required monument.

We look forward to working with Crestone on this item.

Jon Lee

Subject: Erie Champlin 18-9 re-entry and P&A

Good morning Jon,

As discussed over the phone Crestone Peak Resources is requesting permission to enter the lands owned by Community Development Group of Erie , Inc. ("CDG") in Erie so we can re-enter the Erie Champlin well and Plug and Abandon (P&A) the well to using more recent techniques and COGCC standards. The approximate location of the well is depicted in the below aerial.

By return email can you please confirm that you are an authorized representative of CDG and CDG will allow Crestone Peak Resources to enter the location, perform our operation, and restore any disturbed land? We will use the return email as part of our P&A approval with the COGCC.
Once we have approval from the COGCC to enter and perform the P&A I will contact you so we can meet on location to discuss in detail the specific process, ingress/egress you would prefer we use, and any specific surface land disruption.

Thank you for your help and cooperation with this matter.

Respectfully,

Bob Bresnahan
Land Negotiator, *RPL*
Crestone Peak Resources
