Annette,

Please see attached letter in regards to the potential foam use at the WCR 36 / WCR 49 site.

As stated in the formal letter, both of our agencies (Platte Valley & LaSalle) utilize Baum's NovaCool UEF Foam. I am including in this email a link to their SDS for any further information on this product.

https://novacoolfire.com/wp-content/uploads/2019/08/986c36d3-651b-442c-997e-8e9ebe142d68SDS-Baums-Novacool-UEF-rev1.2.pdf

Please let me know if there is any additional information that you require.

Thank you,

Jim Klug

Ok I appreciate your concern, I have been trying to track this down for about 1 month now, I have reached out multiple times. I first contacted La Salle on 10/8, and they directed me to Platte Valley because they said you were the ones who responded to that event. I spoke with Gina a couple times now and relayed my request. I have even called Baums, the manufacturer of Novacool and they have given me what I need from their end, as the manufacturer.

All I need to know is the foam that MAY have been used. It very likely does NOT contain PFAS – so this is all probably a non-issue, but the state wants to see what type of product was *possibly* used. Do you know what type of foam you were purchasing in 2020?

All I need is the manufacturer and product name, thanks.

Annette,

I appreciate your position and the perceived urgency related to this incident that occurred over 4 years ago. We are doing our due diligence on your request, and you will receive a formal response when we conclude our research. Reaching out to various contacts only delays and hampers our efforts.

We still do not have formal clarification on the type, and the amount of foam, that **may have** been utilized on this incident. I will continue to be your main point of contact for this request unless Chief Klug decides to handle this request in another fashion.

Your continued patience is appreciated as we navigate your request.

Respectfully,

Greg Becker

Hi Greg,

Just seeing if you can send me back confirmation on the type of foam you guys use?

Thanks!

Looks like it was 3/2/2020 at about 9:15 AM – I spoke with Zach Hill from La Salle Fire District a couple weeks back and he stated: "Platte Valley Fire Protection District had incident command of this scene, as we were initially not paged to our own incident via a dispatch error. "

Hopefully that helps clear things up! Thanks!

Annette,

I had spoken with Ken Meritt on this request, and I was just waiting on additional information…specifically the date and time of the incident.

Can you send me the date of the incident, so I research which fire district responded to this incident? The request is a bit more complex due to the mutual and automatic aid in this area from the fire districts. Once I learn that I can hopefully identify which fire district used the foam during the mitigation of the emergency.

Thank you.

Subject: Fire Fighting Foam and PFAS

Hi,

I spoke with your receptionist last week about your fire fighting foam, and confirmed that it may be the attached product (see attached SDS).

I believe you team responded to an incident at our Mustang Compressor Station, back in March of 2020 (403964424, -104.605803). This site is owned by Rocky Mountain Midstream. Our Operators were receiving a pig and the liquids caught fire due to a truck being parked too close.

The State of Colorado is wanting us to close out the project, and I need written confirmation from the fire responders that the foam used in this incident did not contain PFAS (Per-and

Polyfluoroalkyl Substances).

I talked to Baums last week and she confirmed for me that is does not contain PFAS, but looking for a written confirmation from the responding party.

Thanks!
