---

Please review the attached Jurisdictional Form. Within the form, you will see that current activities are on-going and no excavation has occurred within the riverine. The area marked in red within the riverine is from equipment disturbances. Excavation will generally proceed to the north and east away from the riverine. Diagrams are attached for viewing/reference purposes. Please contact me at your earliest convenience if you have questions or require additional information. Thanks

Hello Dan,

We have the attached Nationwide Permit 20 that permits certain response operations for oil release.

Thanks,

Celena Cui

Subject: [Non-DoD Source] Spill notification - emergent wetland, Weld County, CO

The purpose of this correspondence is to notify the US Army Corp of Engineers that a spill was discovered on March 28, 2025 at KP Kauffman's Hazel McHale #2 oil and gas facility (40.107451-104850132) located Weld County, Colorado. A Form 19I (404145889) was submitted to the Energy and Carbon Management Commission within 24-hours of discovery, as required. The location of the spill occurred within an emergent wetland and KP Kauffman is currently excavating the soil source material (contaminated), as part of the remediation process.

Please contact me if you require additional information and/or further notifications. Thanks.
