

BEFORE THE OIL AND GAS CONSERVATION COMMISSION
OF THE STATE OF COLORADO

IN THE MATTER OF THE AMENDED)	
APPLICATION OF ENCANA OIL & GAS (USA))	
INC. FOR AN ORDER ESTABLISHING DRILLING)	Cause No. 139, 440
AND SPACING UNITS FOR CERTAIN)	
DESCRIBED LANDS IN THE PARACHUTE FIELD)	Docket No. 0707-SP-17
AREA, GARFIELD COUNTY, COLORADO)	

AMENDED APPLICATION

EnCana Oil & Gas (USA) Inc. (“Applicant”), by and through its attorneys, Beatty & Wozniak, P.C., respectfully submits this **Amended** Application to the Oil and Gas Conservation Commission of the State of Colorado (the “Commission”) for an order establishing drilling and spacing units for certain described lands in the Parachute area, Garfield County, Colorado and in support of its **Amended** Application states and alleges as follows:

- 1. Applicant is a corporation duly authorized to conduct business in the State of Colorado.
- 2. Applicant owns leasehold interests in the following described lands:

Township 7 South, Range 95 West, 6th P.M.
Section 22: All

Garfield County, Colorado

(hereafter the “Application Lands”).

3. That the Application Lands are subject to Orders Nos. 440-32 and 139-16 of the Commission. Order No. 139-16 established 640-acre drilling and spacing units for the production of gas and associated hydrocarbons from the Mesaverde Formation with the permitted well to be located no closer than 990 feet from the unit boundaries of the Application Lands. Order No. 440-32 provided the equivalent of one well per 20 acres in the 640-acre drilling and spacing unit consisting of the Application Lands for the production of gas and associated hydrocarbons from the Williams Fork formation.

4. **The Iles Formation is subject to Rule 318a. well location rules.**

5. Through this **Amended** Application, Applicant wishes to modify the existing 640-acre drilling and spacing unit and establish 40 acre drilling and spacing units in lieu thereof, **for both the Williams Fork and the Iles Formations**. No production proceeds have been distributed based on the 640-acre drilling and spacing unit.

6. That Applicant has drilled, tested and completed wells in the Williams Fork and **Iles Formations** of the Mesaverde Group on the lands nearby to Application Lands.

7. That the established units of 40 acres for the Mesaverde formation is expected to efficiently drain the Williams Fork **and Iles Formations** of the Mesaverde Group of the Application Lands which **are** a common sources of supply and such spacing is not smaller than the maximum area that can be efficiently and economically drained from said **formations**.

8. Applicant requests that the effective well density remain the equivalent of one well per 20 acres for the Williams Fork **Formation, and the same well density of one well per 20 acres be established as to the Iles Formation**, and that the setback requirements be 200 feet from the boundaries of the drilling and spacing unit and 400 feet from an existing Williams Fork **or Iles wells** absent an exception from the Commission.

9. That the above-proposed drilling and spacing will allow more efficient drainage of the Williams Fork **and Iles formations** of the Mesaverde Group; will prevent waste; will not adversely effect correlative rights and will assure the greatest ultimate recovery of gas and associated hydrocarbon substances from the reservoir.

10. That the names and addresses of the interested parties according to the information and belief of the Applicant are set forth in Exhibit A attached hereto and made a part hereof.

WHEREFORE, Applicant respectfully requests that this matter be set for hearing, that notice be given as required by law and that upon such hearing this Commission enter its order consistent with Applicant's proposals as set forth above.

Dated this _____ day of July, 2007.

Respectfully submitted,

ENCANA OIL & GAS (USA) INC.
