

BEFORE THE OIL & GAS CONSERVATION COMMISSION
OF THE STATE OF COLORADO

IN THE MATTER OF THE AMENDED)	
APPLICATION OF ENERGEN RESOURCES)	
CORPORATION AND RED WILLOW)	
PRODUCTION COMPANY FOR AN ORDER)	CAUSE NO. 112
ALLOWING OPTIONAL THIRD AND FOURTH)	
WELLS IN ESTABLISHED 320-ACRE)	Docket No. _____
DRILLING AND SPACING UNITS COVERING)	
THE FRUITLAND COAL SEAM FORMATION,)	
IGNACIO-BLANCO FIELD, ARCHULETA)	
COUNTY, COLORADO)	

AMENDED APPLICATION

Energen Resources Corporation **and Red Willow Production Company** (herein referred to as “Applicants”), by and through their undersigned attorneys, make application to the Oil and Gas Conservation Commission of the State of Colorado, for an order to permit an optional third and fourth well in established 320-acre drilling and spacing units for the Fruitland Coal Seam formation. In support thereof, the Applicants state and allege as follows:

1. That the Applicants are the owners of numerous leasehold interests in Archuleta County, Colorado, located within the area requested for infill drilling.
2. That the Applicants are requesting that two (2) optional infill wells be permitted in each existing drilling and spacing unit of 320 acres for the Fruitland Coal Seam formation covering the lands described on Exhibit A attached hereto and incorporated by reference. Applicants further request that either or both of such optional infill wells be permitted to be drilled and completed as directional or horizontal wells. Moreover, Applicants request that it be granted the option with respect to any previously authorized but undrilled “parent” wells to drill and complete such wells as vertical, directional or horizontal wells.
3. That insofar as this Application concerns lands within the jurisdiction of the Southern Ute Indian Tribe, it is submitted to this Commission in accordance with the terms of the Memorandum of Understanding dated August 22, 1991 between the Bureau of Land Management (“BLM”) and this Commission and separate Memorandum of Understanding dated August 22, 1991 between the Bureau of Indian Affairs, the BLM and the Southern Ute Indian Tribe. In certain of the lands described on Exhibit A, the Southern Ute Indian Tribe owns surface interests, mineral interests or leasehold interests underlying such lands.
4. In support of the requested order, Applicants assert that two wells previously authorized will not efficiently and economically drain each of the 320-acre drilling and spacing units described in Exhibit A, and that additional wells are necessary to prevent waste, protect correlative rights and to recover gas and associated hydrocarbons from the Fruitland coal formation all in accordance with the Colorado statutes, the rules and regulations of this Commission and, with respect to Tribal lands, applicable rules and regulations of the BLM.
5. On June 15, 1988, the Commission issued Order No. 112-60 which established 320-acre drilling and spacing units for production of gas from the Fruitland Coal Seam formation. Said units shall remain as previously established and as described on Exhibit A. Moreover, on July 11, 2000 the Commission issued Order No. 112-157 which permitted a second Fruitland Coal Seam Formation well in each 320-acre drilling and spacing unit with such additional wells being located no closer than 990 feet to any outer boundary of the unit, nor closer than 130 feet to any interior quarter section line.

Applicants propose that optional third and fourth wells in each 320-acre unit or with respect to any previously authorized undrilled parent wells, whether such wells are directional or horizontal completions, be completed or recompleted in the operator's discretion with bottomhole no closer than 660 feet to any outer boundary of the unit and with no setback required to any interior quarter section line.
6. That the surface location of each of the optional wells shall be located on a common or expanded pad with any existing wells such that a total of four Fruitland coal surface well pads shall be authorized in each governmental section.

7. With respect to lands not within the jurisdiction of the Southern Ute Indian Tribe, the Director may, after notice and hearing, approve exceptions to permitted well locations due to topography or surface hazards or the recompletion of wells previously drilled at permitted locations, provided that appropriate notice of such exception location is afforded to offset owners as required by Commission rules.

8. Applicants further state that the requested additional wells can be developed in a manner consistent with protection of public health, safety and welfare. In addition to utilizing a common surface pad, new compressor installations shall use the best available emission control technology and Applicant shall also provide a plan to the Southern Ute Indian Tribe to evaluate the modification of older compression installation emission technology in the field over the next five (5) years.

9. Exhibit B attached hereto and made part hereof is the list of the names of "Owners" required to be notified in accord with Commission Rule 508(a), including within the areas covered by this Application. To the best of Applicants' knowledge and belief, Exhibit B contains the names of all such Owners. The undersigned certifies that copies of this Application shall be served on each interested party as listed on Exhibit B within the next seven days as required by Rule 503.d.

WHEREFORE, Applicants respectfully requests that this matter be set for hearing, that notice thereof be given as required by law and that upon such hearing this Commission enter its order:

A. Establishing that up to four (4) Fruitland Coal wells, whether such wells are directional or horizontal wells, may be completed in each 320-acre drilling and spacing unit for gas and associated hydrocarbons from the Fruitland Coal Seam formation underlying the lands set forth on Exhibit A with the third and fourth wells in each such unit being optional wells in the discretion of the operator located as provided in paragraph 5 and 6 subject to the Director approving exceptions for the permitted well locations as provided in paragraph 7 above.

B. That any previously authorized undrilled "parent" wells in the established drilling and spacing units be authorized to be drilled vertically, directionally or horizontally in the Applicant's discretion provided that such wells comply with the setbacks to the outer boundary of the drilling and spacing unit as described paragraph 5 above.

C. For such other findings and orders as the Commission may deem proper or advisable in the premises.

Dated this _____ day of April, 2008.

Respectfully submitted,

ENERGEN RESOURCES CORPORATION AND
RED WILLOW PRODUCTION COMPANY
