APPLICATION

BP America Production Company and the Southern Ute Indian Tribe, d/b/a Red Willow Production Company (referred to herein as “Applicants”), by and through their undersigned attorneys, makes application to the Oil and Gas Conservation Commission of the State of Colorado, for an order to permit up to four (4) optional infill wells in established 320-acre drilling and spacing units for the Fruitland Coal Seam formation. In support thereof, the Applicants state and allege as follows:

1. That the Applicants are the owners of numerous leasehold interests in La Plata County, Colorado, located within the area requested for infill drilling.
2. That the Applicants are requesting that up to four (4) optional infill wells be permitted in each existing drilling and spacing unit of 320 acres for the Fruitland Coal Seam formation covering the lands described on Exhibit A attached hereto and incorporated by reference. A reference map of the lands is attached hereto.
3. That insofar as this Application concerns lands within the jurisdiction of the Southern Ute Indian Tribe, it is submitted to this Commission in accordance with the terms of the Memorandum of Understanding dated August 22, 1991 between the Bureau of Land Management (“BLM”) and this Commission and separate Memorandum of Understanding dated August 22, 1991 between the Bureau of Indian Affairs, the BLM and the Southern Ute Indian Tribe. In certain of the lands described on Exhibit A, the Southern Ute Indian Tribe owns surface interests, mineral interests and leasehold interests underlying such lands.
4. On June 15, 1988, the Commission issued Order No. 112-60 which established 320-acre drilling and spacing units for production of gas from the Fruitland Coal Seam Formations with 990’ setback to the outer boundary of each unit and a 130’ setback to the interior quarter section line.
5. On December 17, 1990, the Commission issued Order No. 112-85 which amended Order No. 112-61 (which originally amended Order No. 112-60) for other reasons and confirmed the established 320-acre drilling and spacing units for production of gas from the Fruitland Coal Seam formations. The units consisted of the N½ and S½ or the E½ and W½ of a full section with the one (1) permitted well located, when north of the north line of Township 32 North, in the NW¼ and SE¼ of the section, and when south of the north line of Township 32 North, in the NE¼ and SW¼ of the section, and no closer than 990 feet to any outer boundary of the unit, nor closer than 130 feet to any interior quarter section line.
6. On July 11, 2000, the Commission issued Order No. 112-157 which amended Order Nos. 112-60, 112-61, and 112-85 to allow an optional additional well to be drilled for production of gas from the Fruitland Coal Seams for certain of the 320-acre drilling and spacing units subject to this Application, with the permitted well to be located in any undrilled quarter section no closer than 990 feet from the boundaries of the quarter section, nor closer than 130 feet to any interior quarter section line.

7. Commission Order Nos. 112-139, 112-140, 112-141, 112-143, 112-145, 112-153, and 112-154 also allowed additional wells on certain of the established 320-acre

drilling and spacing units subject to this Application. All units referenced in paragraphs 4-7 of this Application shall remain as previously established.

8. In support of the requested order, Applicants assert that the wells previously authorized will not efficiently and economically drain each of the 320-acre drilling and spacing units described in Exhibit A, and that additional wells are necessary to prevent waste, protect correlative rights and to recover gas and associated hydrocarbons from the Fruitland coal formation all in accordance with the Colorado statutes, the rules and regulations of this Commission and, with respect to Tribal lands, applicable rules and regulations of the BLM.

9. Applicants propose that up to four (4) optional infill wells in each 320-acre unit be drilled, completed or recompleted in the operator's discretion with bottomhole no closer than 660 feet to any outer boundary of the unit and that any interior quarter section setback be eliminated.

10. With respect to lands not within the jurisdiction of the Southern Ute Indian Tribe, the Director may, after notice and hearing, approve exceptions to permitted well locations due to topography or surface hazards or the recompletion of wells previously drilled at permitted locations, provided that appropriate notice of such exception location is afforded to offset owners as required by Commission rules.

11. Exhibit B attached hereto and made part hereof is the list of the names of "Owners" required to be notified in accord with Commission Rule 508(a), including within the areas covered by this Application. To the best of Applicants' knowledge and belief, Exhibit B contains the names of all such Owners.

WHEREFORE, Applicants respectfully request that this matter be set for hearing, that notice thereof be given as required by law and that upon such hearing this Commission enter its order:

A. Establishing that a total of up to four (4) optional infill Fruitland Coal wells may be completed in each 320-acre drilling and spacing unit for gas and associated hydrocarbons from the Fruitland Coal Seam formation underlying the lands set forth on Exhibit A with the additional wells being optional wells in the discretion of the operator located as provided in paragraph 9 above subject to the Director approving exceptions for the permitted well locations as provided in paragraph 11 above.

B. For such other findings and orders as the Commission may deem proper or advisable in the premises.

DATED this _____ day of October, 2010.

Respectfully submitted,

BP AMERICA PRODUCTION COMPANY
AND THE SOUTHERN UTE INDIAN TRIBE,
