APPLICATION

Noble Energy, Inc. ("Applicant"), by and through its attorneys, Beatty & Wozniak, P.C., respectfully submits this Application to the Oil and Gas Conservation Commission of the State of Colorado (the "Commission") for an order establishing forty-five (45) approximate 640-acre drilling and spacing units and establishing existing well location rules applicable to the drilling and producing of wells for the production of oil, gas, and associated hydrocarbons from the Niobrara Formation covering certain described lands in Weld County, Colorado and in support of its Application, Applicant states and alleges as follows:

1. Applicant is a corporation duly authorized to conduct business in the State of Colorado.

2. Applicant holds certain leasehold interests in the lands described on Exhibit B attached hereto and incorporated herein by reference (hereafter the "Application Lands"). A reference map of the Application Lands is attached hereto.

3. The Application Lands are subject to Commission Rule 318.a. which provides that a well to be drilled in excess of two thousand five hundred (2,500) feet in depth shall be located not less than six hundred (600) feet from any lease line, and shall be located not less than one thousand two hundred (1,200) feet from any other producible or drilling oil or gas well when drilling to the same source of supply, unless authorized by order of the Commission upon hearing. There are no other specific Commission Orders applicable to the Niobrara Formation underlying the Application Lands.

4. The Niobrara Formation in this area is defined as the stratigraphic equivalent of the interval between 5977' and 6277' as found in the **Peterson PC LG 19-06 Well** located in the SENW of Section 19, Township 8 North, Range 59 West. The Niobrara Formation is a common source of supply underlying the Application Lands.

5. To promote efficient drainage within the Niobrara Formation of the Application Lands, to protect correlative rights and to avoid waste, the Commission should establish drilling

and spacing units of approximately 640 acres as more particularly described in Exhibit B attached hereto and incorporated herein by reference.

6. That Applicant has drilled, tested and completed wells in the Niobrara Formation upon lands in close proximity to the Application Lands.

7. That the above-proposed drilling and spacing units will allow efficient drainage of the Niobrara Formation; will prevent waste; will not adversely affect correlative rights and will assure the greatest ultimate recovery of gas and associated hydrocarbon substances from the reservoirs. Drilling and spacing units of the size and shape specified above are not smaller than the maximum area that can be economically and efficiently drained by the proposed well in each such drilling and spacing unit.

8. That the Applicant is requesting to drill and complete two (2) horizontal wells in each of the established 640-acre drilling and spacing units comprised of the Application Lands. The Applicant states that each proposed horizontal well shall be located on the surface anywhere within the designated drilling and spacing unit with treated interval of any horizontal well to be no closer than 600' from the boundaries of the drilling and spacing unit. The Applicant further maintains that the proposed horizontal wells will have no adverse effect on correlative rights of adjacent owners.

9. That the names and addresses of the interested parties according to the information and belief of the Applicant are set forth in Exhibit A attached hereto and made a part hereof, and the undersigned certifies that copies of this Application shall be served on each interested party within the next seven days as required by Rule 503.e.

WHEREFORE, Applicant respectfully requests that this matter be set for hearing, that notice be given as required by law and that upon such hearing this Commission enter its order consistent with Applicant's proposals as set forth above.

Dated this 7th day of June, 2011.

Respectfully submitted,

NOBLE ENERGY, INC.
