APPLICATION

EOG Resources, Inc. (“Applicant”), by and through its attorneys, Beatty & Wozniak, P.C., respectfully submits this Application to the Oil and Gas Conservation Commission of the State of Colorado (the “Commission”) for an order establishing seventy-eight (78) approximate 640-acre drilling and spacing units and establishing existing well location rules applicable to the drilling and producing of wells from the Niobrara Formation covering certain described lands in Weld County, Colorado and in support of its Application, Applicant states and alleges as follows:

1. Applicant is a corporation duly authorized to conduct business in the State of Colorado.
2. Applicant certain leasehold interests in the lands described on Exhibit B attached hereto and incorporated herein by reference (hereafter the “Application Lands”). A reference map of the Application Lands is attached hereto. Applicant refers to the Application Lands as the “Team North and Team South Areas”. Reference maps of the Application Lands for the Team North and Team South Areas are attached hereto.
3. The Application Lands are subject to Commission Rule 318.a. which provides that a well to be drilled in excess of two thousand five hundred (2,500) feet in depth shall be located not less than six hundred (600) feet from any lease line, and shall be located not less than one thousand two hundred (1,200) feet from any other producible or drilling oil or gas well when drilling to the same source of supply, unless authorized by order of the Commission upon hearing. There are no other specific Commission Orders applicable to the Niobrara Formation underlying the Application Lands.
4. The Niobrara Formation in this area is defined as the stratigraphic equivalent of the interval between 6,020’ and 6,220’ as found in the Rock Oil West Riverside #1 Well located in Township 5 North, Range 62 West, Section 24: SW/4SE/4. The Niobrara Formation is a common source of supply underlying the Application Lands.
5. To promote efficient drainage within the Niobrara Formation of the Application Lands, to protect correlative rights and to avoid waste, the Commission should establish drilling and spacing units of approximately 640 acres as more particularly described in Exhibit B attached hereto and incorporated herein by reference.
6. That Applicant has drilled, tested and completed wells in the Niobrara Formation upon lands near the Application Lands.
7. That the above-proposed drilling and spacing units will allow efficient drainage of the Niobrara Formation; will prevent waste; will not adversely affect correlative rights and will assure the greatest ultimate recovery of gas and associated hydrocarbon substances from the reservoirs. Drilling and spacing units of the size and shape specified above are not smaller than the maximum area that can be economically and efficiently drained by the proposed well in each such drilling and spacing unit.
8. That the Applicant is requesting to drill and complete one (1) horizontal well in each of the established 640-acre drilling and spacing units comprised of the Application Lands. The

Applicant states that each proposed horizontal well shall be located on the surface anywhere within the designated drilling and spacing unit with initial perforation of the Niobrara Formation and an ultimate bottomhole location no closer than 600' from the boundaries of the drilling and spacing unit. The Applicant further maintains that the proposed horizontal wells will have no adverse effect on correlative rights of adjacent owners.

9. On February 22, 2010 the Commission entered Order No. 421-1 which established fifty-eight (58) approximate 640-acre drilling and spacing units in Townships 11 and 12 North, Ranges 62 and 62 West for the production of oil, gas and associated hydrocarbons from the Niobrara Formation with no more than one (1) horizontal well to be drilled in each unit. Order No. 421-1 further ordered that the surface location for each horizontal well shall be located anywhere within the unit, provided that the horizontal leg into the Niobrara Formation shall not be closer than 600 feet to the outside boundary of the drilling unit and the terminus of the horizontal leg shall not be any closer than 600 feet to the outside boundary of the drilling and spacing unit without exception being granted by the Director of the Oil and Gas Conservation Commission. Applicant requests that the Commission take administrative notice of the exhibits and testimony presented by Applicant in Order No. 421-1.

10. On August 12, 2010, the Commission entered Order No. 535-2 approving Rubicon Oil & Gas, LLC's request for one hundred forty-five (145) approximate 640-acre drilling and spacing units in Townships 8, 9, 10, and 11 North, Ranges 65, 66, 67 West, 6th P.M., Weld County, Colorado, for the production of oil and gas and associated hydrocarbons from the Codell and Niobrara Formations and allowed two (2) horizontal wells in each unit, with the initial formation penetration, lateral leg, and terminus (bottomhole location) of the permitted wells no closer than 600 feet from the boundaries of the unit and the initial formation penetration, lateral leg and terminus (bottomhole location) of the second well not closer than 1,200 feet from the first well. Applicant requests that the Commission take administrative notice of the approval of the numerosity of units approved in Rubicon's application.

11. On September 1, 2010, Applicant filed an application for an order to expand Order No. 421-1 and establish eighty-four (84) approximate 640-acre drilling and spacing units in Township 12 North, Range 61 West, Townships 10, 11 & 12 North, Range 62 West, Townships 10, 11, and 12 North, Range 63 West, and Townships 11 & 12 North, Range 64 West in Weld County, Colorado for the production of oil, gas and associated hydrocarbons from the Niobrara Formation with no more than one (1) horizontal well to be drilled in each unit (Docket No. 1010-SP-28). Applicant further requested that the order allow the surface location for each horizontal well to be located anywhere within the unit, provided that the horizontal leg into the Niobrara Formation shall not be closer than 600 feet to the outside boundary of the drilling unit and the terminus of the horizontal leg shall not be any closer than 600 feet to the outside boundary of the drilling and spacing unit without exception being granted by the Director of the Oil and Gas Conservation Commission. The September 1, 2010 application was approved by the Commission on October 21, 2010. Applicant requests that the Commission take administrative notice of the exhibits and testimony presented by Applicant in Docket No. 1010-SP-28.

12. That the names and addresses of the interested parties according to the information and belief of the Applicant are set forth in Exhibit A attached hereto and made a part hereof, and the undersigned certifies that copies of this Application shall be served on each interested party within the next seven days as required by Rule 503.e.

WHEREFORE, Applicant respectfully requests that this matter be set for hearing, that notice be given as required by law and that upon such hearing this Commission enter its order consistent with Applicant's proposals as set forth above.

Dated this ____ day of November, 2010.

Respectfully submitted,

EOG RESOURCES, INC.
