Cause No. 407

Docket No. \_\_\_\_\_

APPLICATION

COMES NOW Noble Energy, Inc. (referred to herein as "Applicant"), by and through its undersigned attorneys, and makes application to the Oil and Gas Conservation Commission of the State of Colorado ("Commission"), for an order establishing one (1) 320-acre wellbore spacing unit for the drilling of one (1) horizontal well for production of oil, gas, and associated hydrocarbons from the Niobrara Formation underlying the S½ of Section 8, Township 4 North, Range 64 West, 6<sup>th</sup> P.M., Weld County, Colorado. In support thereof, the Applicant states and alleges as follows:

1. Applicant is a corporation duly authorized to conduct business in the State of Colorado.
2. Applicant owns substantial portion of the leasehold interests on the Application Lands.

3. On February 19, 1992, the Commission issued Order No. 407-87 (amended August 20, 1993), which among other things, established 80-acre drilling and spacing units for the production of oil and/or gas from the Codell and Niobrara Formations underlying certain lands, including the Application Lands, with the permitted well locations in accordance with the provisions of Order No. 407-1. Order No. 407-1 (amended on March 29, 2000 in accordance with Order No. 407-17, entered November 18, 1985), among other things, established 80-acre drilling and spacing units for the production of oil and/or gas and associated hydrocarbons from the Codell Formation underlying certain lands, including the Application Lands, with the drilling and spacing unit to be designated by the operator drilling the first well in the quarter section, (or the Director, if the operator fails to designate). The permitted well shall be located in the center of either 40-acre tract within the drilling and spacing unit with a tolerance of 200 feet in any direction. The operator shall have the option to drill an additional well on the undrilled 40-acre tract in each 80-acre drilling and spacing unit.

4. On April 27, 1998, the Commission adopted Rule 318A, which, among other things, established drilling windows and allowed certain drilling locations to be utilized to drill or twin a well, deepen a well or recomplete a well and to commingle any or all of the Cretaceous Age Formation from the base of the Dakota Formation to the surface. The Application Lands are subject to the foregoing Order and Rule 318A. Pursuant to Rule 318A.j., Rule 318A supersedes all prior Commission drilling and spacing orders affecting well location and density requirements of GWA wells. A reference map is attached hereto.

5. Applicant plans to drill one (1) horizontal well on the Application Lands. The Franklin C08-62HN Well has a proposed surface location of 520' FSL and 400' FEL of Section 7, Township 4

North, Range 64 West and a proposed bottomhole location of 600' FSL and 1200' FEL of Section 8, Township 4 North, Range 64 West.

6. Applicant requests that the Commission establish a 320-acre wellbore spacing for the Franklin C08-62HN Well on the Application Lands. The proposed 320-acre wellbore spacing unit shall consist of the S½ of Section 8, Township 4 North, Range 64 West, 6<sup>th</sup> P.M., Weld County, Colorado ("Wellbore Spacing Unit"). A reference map is attached hereto.

7. Applicant further confirms that it is not changing the established 80-acre drilling and spacing units for any existing vertical Niobrara Formation wells. Applicant further confirms that it is not changing the established distribution of proceeds for any existing vertical Niobrara Formation wells. Applicant will allocate and distribute proceeds from the Franklin C08-62HN Well on a 320-acre basis.

8. Applicant asserts that a 320-acre wellbore spacing unit for the Franklin C08-62HN Well will allow for economic and efficient drainage of the Niobrara Formation; will prevent waste; will not adversely affect correlative rights and will assure the greatest ultimate recovery of gas and associated hydrocarbon substances from the reservoirs. A 320-acre wellbore spacing unit is not smaller than the maximum area that can be economically and efficiently drained by one (1) horizontal well in such unit.

9. Applicant and the surface owner have a Surface Use Agreement in place for the Franklin C08-62HN Well. The Franklin C08-62HN Well will be located on a new multi-well (two well) pad in order to minimize surface disturbance.

10. The initial perforation of the Niobrara Formation, and the ultimate bottomhole location for the well, shall be no closer than 460' from the boundaries of the 320-acre wellbore spacing unit. The Applicant maintains that the one (1) horizontal well will have no adverse effect on correlative rights of adjacent owners.

WHEREFORE, Applicant respectfully requests that this matter be set for hearing, that notice thereof be given as required by law and that upon such hearing this Commission shall enter its order:

A. Establishing the 320-acre Wellbore Spacing Unit for the Franklin C08-62HN Well;

B. Establishing that the initial perforation of the Niobrara Formation, and the ultimate bottomhole location for the Franklin C08-62HN Well, shall be no closer than 460' from the boundaries of the 320-acre wellbore spacing unit;

C. Finding that the 320-acre wellbore spacing unit will prevent waste, protect correlative rights, and will maximize the efficient and economic production of the Niobrara Formation on the Application Lands; and

D. Granting any other relief necessary to prevent waste and protect correlative rights of the adjacent owners.

Dated this \_\_\_\_ day of March, 2011.

Respectfully submitted,

**Noble Energy, Inc.**
