WELD COUNTY, COLORADO)	

NOTICE OF HEARING

TO ALL INTERESTED PARTIES AND TO WHOM IT MAY CONCERN:

On November 18, 1985, the Commission issued Order No. 407-1 (amended on March 29, 2000) which established 80-acre drilling and spacing units for the production of oil and/or gas and associated hydrocarbons for the Codell and Niobrara Formations underlying certain lands, including the NW¼ of Section 9, Township 5 North, Range 66 West, 6th P.M., with the unit to be designated by the operator upon drilling the first well in the quarter section. The permitted well shall be located in the center of either 40-acre tract within the unit with a tolerance of 200 feet in any direction. The operator shall have the option to drill an additional well on the undrilled 40-acre tract in each 80-acre drilling and spacing unit.

On April 27, 1998, the Commission adopted Rule 318A. which, among other things, allowed certain drilling locations to be utilized to drill or twin a well, deepen a well or recomplete a well and to commingle any or all of the Cretaceous Age Formations from the base of the Dakota Formation to the surface. The above-listed lands were included in this Rule.

On December 22, 2005, Noble Energy Production, Inc. ("Noble"), by its attorney, filed with the Commission a verified application for an order to pool all non-consenting interests in the 160-acre drilling and spacing unit consisting of the NW¼ of Section 9, Township 5 North, Range 66 West, 6th P.M. The Austyn J Well is a directional well with approximate bottomhole location in the center window at 1321' FNL and 1342' FWL, to accommodate a common pad with all other Codell/Niobrara Formation wells in this quarter section as authorized by the City of Greeley permit.
