AND ESTABLISHMENT OF FIELD RULES TO)	
GOVERN OPERATIONS IN THE IGNACIO-BLANCO)	DOCKET NO. 0707-AW-18
FIELD, LA PLATA COUNTY, COLORADO)	

NOTICE OF HEARING

TO ALL INTERESTED PARTIES AND TO WHOM IT MAY CONCERN:

On October 15, 1957, the Commission issued Order No. 112-1, which among other things, established approximate 320-acre drilling and spacing units for production of gas from the Mesaverde Formation, with the permitted well to be located no closer than 990 feet to any outer boundary of the unit, including certain lands in Township 32 North, Range 10 West, N.M.P.M.

On July 16, 1979, the Commission issued Order No. 112-46, which among other things, allowed a second Mesaverde Formation well to be drilled in certain 320-acre drilling and spacing units, including certain lands in Township 32 North, Range 10 West, N.M.P.M.

On May 30, 2007, Williams Production Company, LLC, by its attorney, filed with the Commission a verified application for an order to allow optional third and fourth Mesaverde Formation wells on each 320-acre drilling and spacing unit (or in the case of the lands in irregular Section 21, the drilling and spacing unit consisting of the E½ W½ and E½ of Section 21) for the below-listed lands:

Township 32 North, Range 10 West, N.M.P.M
Section 7: E½ and W½
Section 8: E½ and W½
Section 17: N½
Section 18: E½ and W½
Section 21: E½ W½ and E½

All future Mesaverde Formation wells drilled upon the application lands may be located downhole anywhere within a given 320-acre drilling and spacing unit provided that no well may be located downhole any closer than 660 feet to the drilling unit boundary and no closer than 660 feet to any other well producing from the Mesaverde Formation. These setback requirements would also apply to all future Mesaverde Formation wells drilled upon the drilling and spacing unit consisting of the E½ W½ and E½ of Section 21 of the application lands.

In addition, for purposes of this application, the Mesaverde Formation should be defined as the interval between the stratigraphic equivalent of the point at the top of the Huerfanito Bentonite and the stratigraphic equivalent of the point 500 feet below the top of the Point Lookout Formation found in the Dual Induction Log for the BR #2B Ute Well located in the SE¼ of Section 14, Township 32 North, Range 11 West, N.M.P.M.
