GOVERN OPERATIONS IN THE BRUSH CREEK)	DOCKET NO. 0801-AW-04
FIELD, MESA COUNTY, COLORADO)	

NOTICE OF HEARING

TO ALL INTERESTED PARTIES AND TO WHOM IT MAY CONCERN:

Rule 318.a. of the Rules and Regulations of the Commission requires that wells drilled in excess of 2,500 feet in depth be located not less than 600 feet from any lease line, and located not less than 1,200 feet from any other producible or drilling oil or gas well when drilling to the same common source of supply. The E½ NE¼ of Section 23, Township 9 South, Range 94 West, 6th P.M. is subject to this Rule.

On June 5, 2006, the Commission issued Order No. 429-4, which among other things, allowed the equivalent of one well per 10 acres to be optionally drilled in various unspaced lands in Townships 9 and 10 South, Range 94 West, 6th P.M., including certain lands in Section 23, Township 9 South, Range 94 West, 6th P.M., with the permitted well to be located no closer than 100 feet from the boundary of the unit or lease line, for production of gas from the Mesaverde Formation. Wells shall be located downhole anywhere on the application lands, but no closer than 100 feet from the boundaries of any lease line, without exception granted by the Director. In cases where the application lands abut or corner lands where the Commission has not, at the time of the drilling permit application, granted the right to drill 10-acre density Mesaverde Formation wells, wells should be located downhole no closer than 200 feet from the lease line that so abuts or corners the lands where 10-acre density downhole drilling of Mesaverde Formation wells has not been ordered by the Commission.

All Mesaverde Formation wells shall be drilled from the surface either vertically or directionally from no more than one (1) pad located on any quarter quarter section unless exception is granted by the Director.

On November 20, 2007, Plains Exploration & Production Company, by its attorney, filed with the Commission a verified application for an order to amend Order No. 429-4 to include the E½ NE¼ of Section 23, Township 9 South, Range 94 West, 6th P.M., to allow the equivalent of one well per 10 acres for the production of gas and associated hydrocarbons from the Mesaverde Formation including the Williams Fork, Rollins, Cozzette and Corcoran Formations, with the wells will be drilled in accordance with Order No. 429-4.
