Rule 318.a. of the Rules and Regulations of the Commission requires that wells drilled in excess of 2,500 feet in depth be located not less than 600 feet from any lease line, and located not less than 1,200 feet from any other producible or drilling oil or gas well when drilling to the same common source of supply. Certain lands in Townships 6 and 7 North, Ranges 80 and 81 West, 6th P.M. are subject to this Rule.

On February 25, 2008, the Commission issued Order No. 531-1, which among other things, established various drilling and spacing units for the drilling and completion of one horizontal well, for certain lands in Township 6 North, Range 80 West, 6th P.M., for production from the Niobrara Formation, with the option to drill a second horizontal well, in each of the drilling and spacing units except for within the approximate 480-acre drilling and spacing units where only well was allowed.

On May 23, 2008, EOG Resources, Inc. ("EOG"), by its attorney, filed with the Commission a verified application for an order to extend the provisions of Order No. 531-1 to establish drilling and spacing units of approximate size and configuration as described below for production from the Niobrara Formation, for the drilling and completion of one horizontal well, with the option to drill a second horizontal well, in each of the drilling and spacing units.
