TO ALL INTERESTED PARTIES AND TO WHOM IT MAY CONCERN:

Rule 318.a. of the Rules and Regulations of the Oil and Gas Conservation Commission requires that wells drilled in excess of 2,500 feet in depth be located not less than 600 feet from any lease line, and located not less than 1,200 feet from any other producible or drilling oil or gas well when drilling to the same common source of supply. Certain lands in Township 7 South, Range 93 and 94 West, 6<sup>th</sup> P.M. are subject to this Rule.

On April 21, 2008, Laramie Energy II, LLC (“Applicant”), by its attorney, filed with the Commission a verified application for an order requesting that 10-acre density drilling be established for the production of gas and associated hydrocarbons from the Williams Fork and Iles Formations for the following described lands:

Township 7 South, Range 93 West, 6<sup>th</sup> P.M.  
Section 19: Lot 1 and 2

Township 7 South, Range 94 West, 6<sup>th</sup> P.M.  
Section 24: Homestead Entry Survey No. 309, being the parcel described more particularly as beginning at Corner No. 1, identical with the Northwest corner of Section 19, Township 7 South, Range 93, West 6<sup>th</sup> P.M.; thence South 41’ East 34.62 chains to Corner No. 2; thence North 85 degrees 11’ West 20.43 chains to Corner No. 3; thence North 18 degrees 22’ West 14.50 chains to Corner No. 4; thence North 23’ West 19.15 chains to Corner No. 5; thence East 24.63 chains to Corner No. 1, the place of beginning.

All future Williams Fork Formation and Iles Formation wells to be drilled on the application lands should be located downhole anywhere upon such lands but no closer than 100 feet from a lease line or the boundaries of the application lands without exception being granted by the Director of the Oil and Gas Conservation Commission. In cases where the application lands abut or corner lands in respect of which the Commission has not at the time of drilling permit application granted the right to drill 10-acre density wells, the well should be located downhole no closer than 200 feet from the boundary or boundaries of the application lands so abutting or cornering such lands without exception being granted by the Director of the Oil and Gas Conservation Commission.

All wells drilled to the Iles Formation will be drilled only in connection with the drilling of Williams Fork Formation wells. All Williams Fork Formation and Iles Formation wells drilled upon the application lands will be drilled from the surface either vertically or directionally from no more than one pad located on a given quarter quarter section (or lots or parcels approximately equivalent thereto) unless exception is granted by the Director of the Colorado Oil and Gas Conservation Commission.
