On June 6, 2005, the Commission issued Order No. 139-47, which among other things, approved 10-acre density drilling for Section 19, Township 6 South, Range 93 West, 6th P.M. for the production of gas and associated hydrocarbons from the Williams Fork Formation.

On April 21, 2008, Laramie Energy II, LLC ("Applicant"), by its attorney, filed with the Commission a request that 10-acre density drilling be established for the production of gas and associated hydrocarbons from the Iles Formation for the W½ of Section 19, Township 6 South, Range 93 West, 6th P.M.

All future Iles Formation wells to be drilled on the application lands should be located downhole anywhere upon such lands but no closer than 100 feet from a lease line or the boundaries of the application lands without exception being granted by the Director of the Oil and Gas Conservation Commission. In cases where the application lands abut or corner lands in respect of which the Commission has not at the time of drilling permit application granted the right to drill 10-acre density wells, the well should be located downhole no closer than 200 feet from the boundary or boundaries of the application lands so abutting or cornering such lands without exception being granted by the Director of the Oil and Gas Conservation Commission.

All wells drilled to the Iles Formation will be drilled only in connection with the drilling of Williams Fork Formation wells. All wells drilled upon the application lands will be drilled from the surface either vertically or directionally from no more than one pad located on a given quarter quarter section (or lots or parcels approximately equivalent thereto) unless exception is granted by the Director of the Colorado Oil and Gas Conservation Commission.
