OF THE STATE OF COLORADO

IN THE MATTER OF THE PROMULGATION)	CAUSE NO. 139
AND ESTABLISHMENT OF FIELD RULES TO)	
GOVERN OPERATIONS IN THE RULISON)	DOCKET NO. 0908-SP-18
FIELD, GARFIELD COUNTY, COLORADO)	

NOTICE OF CONTINUATION OF HEARING

TO ALL INTERESTED PARTIES AND TO WHOM IT MAY CONCERN:

Rule 318.a. of the Rules and Regulations of the Oil and Gas Conservation Commission requires that wells drilled in excess of 2,500 feet in depth be located not less than 600 feet from any lease line, and located not less than 1,200 feet from any other producible or drilling oil or gas well when drilling to the same common source of supply. Section 15, Township 7 South, Range 94 West, 6th P.M. is subject to this Rule for the Williams Fork and Iles Formations.

On March 31, 2008, the Commission issued Order No. 139-85, which among other things, allowed the equivalent of one well per 10 acres, with the permitted well to be located no closer than 100 feet from the outside boundary for certain lands, including Section 15, Township 7 South, Range 94 West, 6th P.M., for the production of gas and associated hydrocarbons from the Williams Fork Formation.

On June 29, 2009, Williams Production RMT Company ("Williams"), by its attorney, filed with the Commission a verified application to: (1) establish an approximate 640-acre drilling and spacing unit, consisting of Section 15, Township 7 South, Range 94 West, 6th P.M., for the production of gas and associated hydrocarbons from the Williams Fork and Iles Formations, (2) continue to allow the equivalent of one well per 10 acres for said Section 15, for the production of gas and associated hydrocarbons from the Williams Fork Formation, and (3) allow the equivalent of one well per 10 acres for said Section 15, for the production of gas and associated hydrocarbons from the Iles Formation.

On August 11, 2009, the Bureau of Land Management ("BLM") filed a Protest to the application. Consequently, on August 13, 2009, Williams, by its attorney, requested a continuance of this matter until the September Commission hearing.

On August 28, 2009, Williams Production RMT Company ("Williams"), by its attorney, filed with the Commission a verified amended application which limited its prayer for relief to allow the equivalent of one well per 10 acres for Section 15, Township 7 South, Range 94 West, 6th P.M., for the production of gas and associated hydrocarbons from the Williams Fork and Iles Formations, and requested a continuance on the amended application until the November Commission hearing.

All future Iles Formation wells to be drilled upon the application lands should be located downhole anywhere within a given drilling unit but no closer than 100 feet from the boundary or boundaries of the lease line without exception being granted by the Director of the Oil and Gas Conservation Commission. It is provided, however, that in cases where a drilling and spacing unit of the application lands abuts or corners lands in respect of which the Commission has not at the time of drilling permit application granted the right to drill 10-acre density Iles Formation wells, the well should be located downhole no closer than 200 feet from the boundary or boundaries of the lease line so abutting or cornering such lands without exception being granted by the Director of the Oil and Gas Conservation Commission.

That, except as previously authorized by order of the Commission, wells to be drilled under this application should be drilled from the surface either vertically or directionally from no more than one pad located on a given quarter quarter section (or lots or parcels approximately equivalent thereto) unless exception is granted by the Director of the Oil and Gas Conservation Commission pursuant to application made for such exception.
