On April 8, 2010, Williams Production RMT Company, by its attorney, filed with the Commission a verified application to approve the equivalent of one well per 10 acres well density for the N½ of Section 7, Township 7 South, Range 95 West, 6<sup>th</sup> P.M., for the production of gas and associated hydrocarbons for the Williams Fork Formation, with setback and development rules described below:

All future Williams Fork wells to be drilled upon said drilling and spacing unit should be located downhole anywhere in the drilling and spacing unit but no closer than 100 feet from the boundaries of the unit without exception being granted by the Director of the Commission. It is provided however that in cases where the lands abut or corner lands in respect of which the Commission has not at the time of drilling permit application granted the right to drill 10-acre density Williams Fork wells, the well should be located downhole no closer than 200 feet from the boundary or boundaries of the drilling unit so abutting or cornering such lands without exception being granted by the Director of the Commission.

That, except as previously authorized by order of the Commission, wells to be drilled under this order should be drilled from the surface either vertically or directionally from no more than one pad located on a given quarter quarter section (or lots or parcels approximately equivalent thereto), unless exception is granted by the Commission pursuant to application made for such exception.
