Rule 318.a. of the Rules and Regulations of the Oil and Gas Conservation Commission requires that wells drilled in excess of 2,500 feet in depth be located not less than 600 feet from any lease line, and located not less than 1,200 feet from any other producible or drilling oil or gas well when drilling to the same common source of supply. Section 11, Township 11 North, Range 64 West, 6th P.M. is subject to this Rule for the Niobrara Formation.

On April 27, 1998, the Commission adopted Rule 318A., which among other things, allowed certain drilling locations to be utilized to drill or twin a well, deepen a well or recomplete a well and to commingle any or all of the Cretaceous Age Formations from the base of the Dakota Formation to the surface. On December 5, 2005, Rule 318A. was amended to, among other things, allow interior infill and boundary wells to be drilled and wellbore spacing units to be established. Section 20, Township 4 North, Range 62 West, 6th P.M. was included in this Rule.

On July 21, 2011, EOG Resources, Inc. ("EOG" or "Applicant"), by its attorneys, filed with the Commission a verified application (the "Application") for an order to establish two approximate 640-acre drilling and spacing units for the below-listed lands, and approving one horizontal well within each unit, for the production of oil, gas and associated hydrocarbons from the Niobrara Formation, with the treated interval of the permitted well to be located no closer than 600 feet from the boundaries of the unit:
