

BEFORE THE OIL AND GAS CONSERVATION COMMISSION
OF THE STATE OF COLORADO

IN THE MATTER OF THE PROMULGATION AND	)	CAUSE NO. 407
ESTABLISHMENT OF FIELD RULES TO GOVERN	)	
OPERATIONS IN THE WATTENBERG FIELD,	)	DOCKET NO. 1112-EX-22
WELD COUNTY, COLORADO	)	

NOTICE OF HEARING

TO ALL INTERESTED PARTIES AND TO WHOM IT MAY CONCERN:

On April 27, 1998, the Commission adopted Rule 318A.a., which among other things, designated the following surface drilling locations for wells drilled in the Greater Wattenberg Area ("GWA") windows, including Section 17, Township 6 North, Range 61 West, 6th P.M.:

(1) A square with sides four hundred (400) feet in length, the center of which is the center of any governmental quarter-quarter section ("400' window"); and

(2) A square with sides eight hundred (800) feet in length, the center of which is the center of any governmental quarter section ("800' window").

(3) Absent a showing of good cause, which shall include the existence of a surface use or other agreement with the surface owner authorizing a surface well location outside of the GWA window, all surface wellsites shall be located within a GWA window.

On February 22, 2011, the Commission issued Order No. 535-4, which, among other things, established an approximate 640-acre drilling and spacing unit for Section 17, Township 6 North, Range 61 West, 6th P.M., and approved one horizontal well within the unit, for the production of oil, gas and associated hydrocarbons from the Niobrara Formation, with the initial perforation and the ultimate bottomhole location being no closer than 600 feet from the boundaries of the unit without exception being granted by the Director.

On October 13, 2011, EOG Resources, Inc. ("EOG" or "Applicant"), by its attorneys, filed with the Commission a verified application ("Application") for an order authorizing an exception surface location from Rule 318A.a. for a proposed horizontal well, namely the Greasewood #07-17H Well, to be drilled from a surface location of 501 feet FNL and 200 feet FWL in the NW¼ NW¼ of Section 17, Township 6 North, Range 61 West, 6th P.M. Further, EOG alleges that the surface location will allow the optimum wellbore positioning for the horizontal development of the Niobrara Formation within the established drilling and spacing unit while maintaining the setback from the boundaries of the unit.
