APPENDIX C
Photographs

Photo # 29 – Gypsum spreading operations

Photo # 30 – Application of gypsum and ripping

Photo # 31 – Land treatment area after gypsum amendments applied

Photo # 32 – Land treatment area after gypsum amendments applied

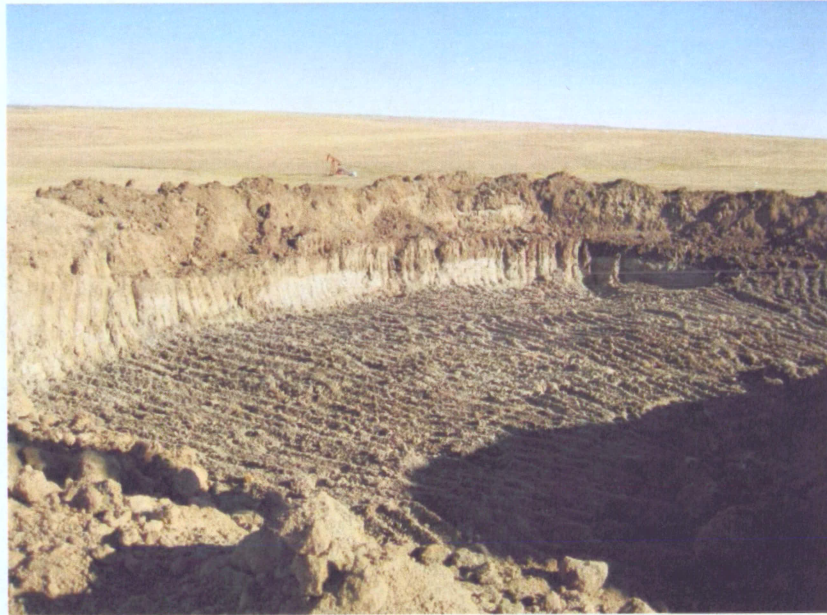

Photo # 25 – Excavated evaporation pit

Photo # 27 – Evaporation pit area after backfilling

Photo # 26 – Location of confirmation samples in evaporation pit

Photo # 28 – Land treatment area prior to amendment with gypsum

Photo # 21 – 36-23 wellhead area after backfilling

Photo # 22 – Process area after initial excavation

Photo # 23 – Manual excavation of process area after removal of fiberglass tank

Photo # 24 – Excavation of evaporation pit bottom materials

Photo # 17 – Skim pit after removal of wildlife screen

Photo # 18 – Skim pit excavation

Photo # 19 – 36-23 wellhead excavations

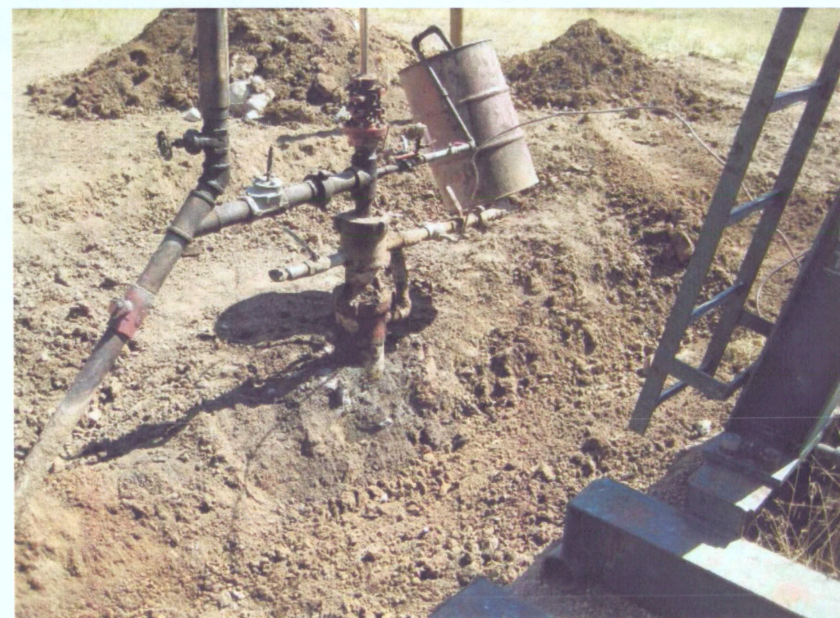

Photo # 20 – 36-23 wellhead area excavation

Photo # 13 – Excavation of tank berm area – north side

Photo # 15 – Tank berm area excavation – south side

Photo # 14 – Tank berm area excavation

Photo # 16 – Tank berm area excavation – northwest corner

Photo # 9 – Initial excavation of impacted soils from tank berm area

Photo # 11 – Petroleum-Impacted soils in tank berm area

Photo # 10 – Flow line to storage tanks

Photo # 12 – Impacted soils in tank berm area near recycle line

Photo # 5 – Evaporation pit on June 26, 2007

Photo # 7 – PVC header system and former land treatment area

Photo # 6 – Evaporation pit and skim pit outlet

Photo # 8 – Tank unloading area prior to remediation

Photo # 1 – Spill in Tank Berm Area on June 26, 2007

Photo # 3 – Process Area spill on June 26, 2007

Photo # 2 – Spill in Tank Berm Area on June 26, 2007

Photo # 4 – Skim Pit on June 26, 2007

Photo # 33 – Placement of erosion controls

Photo # 34 – Land treatment area with erosion controls

Photo # 35 – Rebuilt State-Alberta process area

Photo # 36 – Rebuilt State-Alberta tank battery
