One more clarification: Did you want to keep the oil pipeline and gas pipeline on the facility list? Mary

Mary,
I clarified, on this well, the facilities we discussed under the COGCC "adjusted" requirements. We will have, on site, permanently 1 well, 1 water tank, 1 separator, 1 VOC Combustor, 2 oil tanks, 1 Pump Jack and 1 electric motor.

Please also be advised that all of our current in progress, etc. wells @ the COGCC have the full amount of equipment listed that would be used in the drilling, & completion phases. This was based on the previous requirement that we were working with. Going forward, Noble will go back to just listing the equipment, on site, that will be permanent as best we can determine @ the time of permit request.

Hang in there. We will all make it through this transition & will laugh about it later. Please let me know what else I can do for you to facilitate the permits moving through. Thanks, Mari
