Valerie & Mary,

Pursuant to my conversation with Mary this afternoon, it will be fine if you place the changes and COAs listed below on the Form 2A for the Bernhardt 13T.

Thank you both.

Subject: DOC # 400001977 FOrM 2A Bernhardt #13T

Sarah,

Hi – I will be looking at the Form 2A's for the east half of Colorado. I left a message for you to call me. I need to talk to you about the issues below and I also have a question about the facilities.

Based on the information given in your Form 2A and the data from the surrounding water wells I would like to make the following changes to your form:

Under water resources :
Sensitive area = yes

Under comments:
Water well permits 13701-F static water level 15 feet, 841-WBC static = 9 feet, 85-R-R static = 9 feet.

We consider an area to be sensitive when the ground water is at 20 feet or shallower.

I will be placing a Condition of Approval on the location that says:
Location is in a sensitive area because of shallow groundwater; therefore, either a lined drilling pit or a closed loop system is required.

Please let me know via responding to this email that you concur with the above changes.
