**Client Project ID**

## **CASE NARRATIVE**

### **SAMPLE RECEIVING**

Sample(s) were hand delivered to the laboratory by the client.

Custody seals were not present.

The temperature of the sample(s) upon arrival was 4.1°C.

Sample(s) were received in good condition, in the proper container, and within holding times.

Sample(s) were preserved properly.

VOC sample(s) were marked as preserved on the bottle labels.

VOC sample(s) were received with no headspace present. NJO

### **QUALITY ASSURANCE (QA)**

Analyses performed on samples in this work order by EAL meet the requirements of the EAL Quality Assurance Program unless otherwise explained. Analyses of drinking water samples meet the requirements of the EPA Manual for the Certification of Laboratories Analyzing Drinking Water, unless otherwise explained. JE

### **CLIENT SERVICES**

There are no anomalies to report. PM

The MtBE was removed at the request of the client. AE 8/12/09

### **GENERAL CHEMISTRY**

Method 300.0: Sample Anderson (09-6049-01) has a high conductivity level and a high Chloride level, which required dilution of the sample to avoid saturating the detector and to separate the Nitrite-N peak from the Chloride peak. This raised the reporting limits for Nitrate-N, Sulfate, Nitrite-N and Nitrite+Nitrate-N. There are no other anomalies to report. JML/MM/JE

### **METALS ANALYSIS**

Method E200.7: Matrix spike and matrix spike duplicate (MS/MSD, on another clients sample) recoveries for Sodium are outside the QC limits due to the high concentration of Sodium in the sample versus the low concentration of the spike. The laboratory control spike (LCS) recovery of Sodium is within QC limits, proving the analysis is in control. The dissolved Potassium and Sodium results were slightly higher than the total Potassium and Sodium result. This is within sample reproducibility limits and the dissolved result is essentially the same as the total result. There are no other anomalies to report. MB/JE

Lab Work Order: 09-6049  
Client Project ID:

Dear Bob Chesson:

Enclosed are the analytical results for the samples shown in the Laboratory Work Order Summary.

THE INVOICE WILL BE MAILED FROM OUR NEW JERSEY OFFICE UNDER SEPARATE COVER.

The enclosed data for testing performed at Accutest Laboratory (formerly Evergreen Analytical) have been reviewed for quality assurance. A case narrative is included to describe any anomalies associated with the samples or data.

Accutest will dispose of all samples 44 days from the sample receipt date. If you want samples returned, please advise us by mail or fax as soon as possible.

A copy of this project report and supporting data will be retained for a period of five years unless we are otherwise advised by you. A document retrieval charge will apply.

Thank you for using the services of Accutest Laboratories. If you have any questions concerning the analytical data, please contact me. Please direct other questions to Client Services.

Sincerely,

Joseph J Egry IV/ Tiffany Pham  
Quality Assurance
