RE: Leonard L17-2, 7
Form 27 and Closure Request Cover Letter
Sec.17, T3N, R66W
API 05-123-15250
Weld County, Colorado

Dear Mr. Chesson:

On September 21, 2009, a historical impact was discovered at the abovementioned location during battery relocation operations. Neither surface water nor groundwater was impacted. Remediation activities commenced on Sept 28, 2009 and concluded on October 1, 2009. Hydrocarbon field kit analysis for soils assisted in the determination of excavated volumes. Approximately 583 cubic yards of impacted soil were hauled to the Noble Energy landfarm in Weld County.

The attached documentation includes a completed Form 27, laboratory analytical results from confirmation soil samples, and site diagram showing sample location and results. Based on the site remedial activities and the attached laboratory analytical results, NEI is requesting that the COGCC consider this location remediated, requiring no further action.

Please contact the NEI environmental department at (970) 785-5025 if you have any questions or require additional information.

Sincerely,

A handwritten signature in black ink, appearing to read 'm. cox'.
