Subject: RE: Form 2A Status Cozzens Sec 9 6N65W
Attachments: Cozzens 41-9 Hydrology Map2.pdf

Keith and Mary, my apologies for the delay. Please find my answers below.

Cozzens 31-9 (400006097)

- Post-construction elevation is the same as pre-construction elevation.
- I agree to your revision of Section 14 Water Resources to add the distance to the irrigation ditch.
- I will have to find out about the potential expansion of the common tank battery at the Cozzen Farms 1-9E, and will let you know. → Existing Pad + Well

Cozzens 41-9 (400005917)

- Section 5 Facilities: This well is going to be tied into the common tank battery site with the Cozzens 9C, 42-9D, 9SD, and 32-9D. The 2A for that site includes those 4 wells and the tank battery (400006260). I realized that I did not list the 41-9 as part of that 2A, but its tanks and equipment are included there. If I list them on this 2A as well, wouldn't that over-estimate the amount of equipment for this well? - KES, listing in 2A plz to file
- I approve the classification of Sensitive Area.
- I have attached a Hydrology Map (it was easier to create a new one than print, scan, etc.).

Please let me know if you need anything else, and I'm really appreciative that you guys are working on these already.

In reviewing the OGLA Form 2A Permit Applications for the above referenced proposed oil and gas facility locations, the following issues presented which require your attention prior to completing the applications.

Cozzens 31-9 (400006097)

Section 5 Facilities: If the tank battery site at Cozzen Farms 1-9E is to be expanded, or additional land disturbed, please file a Form 2A for that location.

Section 6 Construction: Estimated post-construction elevation is blank, please provide approval for OGCC to complete this section using 4760 ft or provide correct planned elevation, if different.
