Subject Noble Energy, Alley J 33-22D , NWSE Sec 33 T5N R66W, Weld County, Form 2A #40012795 Review

Mari,

I have been reviewing the Alley J 33-22D Form 2A (#400012795). COGCC requests the following clarifications regarding the data Noble has submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment.

1. **Water Resources (Section 14):** Form 2A indicates that the distance to the nearest surface water is 22 feet. Form 2A also indicates the depth to groundwater to be 16 feet bgs for a well located 2700 feet away from the proposed pad (Permit No. 135069-Bullene, household well, with a total depth of 30 feet bgs, a depth to groundwater of 16 feet bgs, and a pumping rate of 2 gpm).

COGCC guidelines require designating all locations with shallow groundwater (i.e., less than 20 feet) a **sensitive area** and requiring the following conditions of approval (COAs):

COA 1 - Location is in a sensitive area because of shallow groundwater; therefore, either a lined drilling pit or closed loop system is required.

COA 5 - Operator must implement best management practices to contain any unintentional release of fluids.

COGCC requires your written acknowledgement of these COAs prior to passing the OGLA review. If you have any questions, please do not hesitate to call me at (970) 625-2497 x5 (office) or (970) 309-2514 (cell), or email. Thanks.

Dave
