Larry,

It is not a public road. The public should not use the road but I can't guarantee that there has never been someone not authorized to use the road drive on our road.

This is a simple question. Does the public use this road on occasion? If they are, than the road must be restricted to ALL public use during operations. A CAO will be added to the permits.

Phyllis,

The subject road is our lease road used and maintained by us to access our wells on private property in the NE. We have a SUA in place with the private surface owner and the access road is not gated or restricted.

Please let me know if you have any other questions.

Hi Jevin,

I am sorry to have duplicated my requests for information. In the case of this location and the other Billings pad in the SWNE of this section, I need additional information about the road that goes by these pads. Even though it is not a road maintained by the town of Frederick, is public access limited somehow? Is it gated or restricted in any way to pumpers?

Thank you.

Phyllis,

Here is one more I sent back to you on 1/4/10 regarding the road.

Scott,

Same thing on this road as the other Billings pad, it is not a public road. As for the building it is abandoned. Photographs of building attached.

Please let me know if you need anything else.

Jevin,

I am reviewing the subject location assessment. You show the distance to the nearest public road as 820'. However, your location drawing shows a 12' dirt road approximately 110' to the west of the proposed location. The COGCC GIS maps show that dirt road as a public road. Can you verify whether it is or is not public? Also, your application shows the distance to the nearest building as 804', but your location drawing shows an abandoned building 361' to the north—what is that building?

Thank you.

Phyllis K. Scott
