I will change it to 5/2/2001. That's the date of Ed's field inspection.

STATUS DATE

Change the status of this well to PA on 5/1/2001. this was one of the wells at little beaver field we didn't know the status of. And there is no paperwork on the well. There was an agreement reached with DiMatteo and magpie that we would dig this and other wells up and see what was going on. We never did find this one, but binkley was there when they started to plug the well. So we decided to accept this one as plugged.
