Re: Well Pad PL31SW
Nichols 31-11

Dear Mr. Nichols:

Today I received a request from Michael Warren, whom you met when we went to the on-site last year. He would like for me to get a signed document from you stating that you do not have any objections to the following:

“Visits to the well site will be reduced by the use of remote monitoring (i.e. SCADA) and the use of multi-function contractors. EnCana and its contractors will maximize the use of state-of-the-art drilling technology when available to minimize disturbance. Post-development well site visitations will be conducted between the hours of 9:00 a.m. and 4:00 p.m. during December 1 and April 15 in mule deer critical winter range. On the occasion that well conditions are not stabilized, EnCana will be allowed to work any hours during the day or year, as necessary to stabilize the well. This BMP excludes fluid movement in order to protect the environment and workovers required for maintenance of the well. Hours for well site visits will not be restricted outside the mule deer critical winter range period of the December 1 to April 15.”

Please do not hesitate to call me with any questions. Phone 970-285-2677.

Sincerely,

A handwritten signature in blue ink that reads "Joe Haney".

Joe Haney
Consulting Landman

I Ben E. Nichols ACKNOWLEDGE THIS 11th Day of February, 2010, that I have no objections to the above written statement.

A handwritten signature in blue ink that reads "Ben E. Nichols".

Ben E. Nichols
