

CDOW Conditions of Approval for the McAfee 16H-12-38-17

1. Muffle or otherwise control exhaust noise from well sites and compressors during the production period so that operational noise will not exceed 49dBA at 30 ft, or an equivalent noise reduction at a given distance. *NOTE THAT NOISE LEVELS AT EXISTING PRODUCING WELLS IN THIS AREA RANGE FROM 35dBA - 40dBA AT 30 FT.*
2. In consultation with CDOW and landowner, replace any permanently impacted, disturbed, or altered elk winter concentration area by enhancing marginal sagebrush steppe communities (sagebrush and mountain shrub) and grassland within or immediately adjacent to impacted habitat. *THIS MAY INCLUDE A WATER DEVELOPMENT.*
