Dave

Attached is a plat showing the proposed lines for the RMV 129-29 pad. I hope this satisfies your request.

We have no problem with the other proposed COA's for the pad. We will have berms in place sufficient for 110% secondary containment as well as other required best management practices.

Let me know if you need anything else.

Thanks,

Howard Harris

Subject: Williams Production RMT Savage RMV 129-29, NESE Sec 29 T6S R94W, Garfield County, Form 2A (#2094935) Review

Howard,

I have been reviewing the Savage RMV 129-29 **Form 2A** (#2094935). COGCC requests the following clarifications regarding the data Williams has submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment.

1. **Water Resources (Section 14):** Form 2A indicates the distance to the nearest surface water is 492 feet. Form 2A also indicates the depth to groundwater to be 145 feet bgs for a well located 4028 feet from the proposed well pad. COGCC's review indicates there is a water well (Permit No. 36200-F-Garrison, domestic well) to the southeast, with a total depth of 180 feet bgs, a depth to groundwater of 110 feet bgs, and a pumping rate of 12 gpm. I believe this is the well you located. I can make the change if you send an email with this request. COGCC guidelines require designating all locations within ¼ mile of the Colorado River, and/or with close proximity to surface water (i.e., less than 500 feet), a **sensitive area**. The following conditions of approval (COAs) will apply:

COA 4 - Location is in a sensitive area because of proximity to surface water and a domestic water well; therefore, operator must ensure 110 percent secondary containment for any volume of fluids contained at well site during drilling and completion operations.

COA 5 - Operator must implement best management practices to contain any unintentional release of fluids.

2. **Water Resources (Section 14):** Form 2A indicates the depth to groundwater to be 145 feet bgs for a well located 4028 feet from the well pad. COGCC's review indicates there is a water well (Permit No. 36200-F-Garrison, domestic well) to the southeast, with a total depth of 180 feet bgs, a depth to groundwater of 110 feet bgs, and a pumping rate of 12 gpm. I believe this is the well you located. I can make the change if you send an email with this request.
3. **Rule 303.d.(3).C.:** Neither the scaled construction layout drawing (Plat 2) nor the location drawing (Plat 6) show the location of the gas pipeline. One of these drawings should show the existing/anticipated location of the pipeline.

COGCC would appreciate your concurrence with attaching these COAs to the Form 2A permit prior to passing the OGLA review. The other issues need to be addressed before I can pass this permit. If you have any questions, please do not hesitate to call me at (970) 625-2497 x5 (office) or (970) 309-2514 (cell), or email. Thanks.

Dave
