15. Comments:

#1 - Consultation - In that this location is in a sensitive wildlife area Delta Petroleum has consulted with the DOW and we have implemented the proposed recommendations into the attached BMP outline. #4 - Location Identification - Control for survey was established using differentially corrected GPS from an Opus based control network. Well location was established using non-GPS conventional methods, therefore no PDOP reading was taken. #6 - Construction - Delta Petroleum used well BCU 12-444 as the point to determine distance from wellhead. #14 - Water Resources - The depth to ground water was determined by using static water level data of nearest waterwell (Permit # 258499/ Receipt # 9501882). The reference area is undisturbed ground immediately adjacent and northwest of the pad as shown in north and west location photos.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
