15. Comments:

#4 – GPS Data: No PDOP reading is available as per Surveyor - Control for survey was established using differentially corrected GPS from an Opus based control network. Well location was established using non-GPS conventional methods, therefore no PDOP reading was taken. #6 - Construction - Delta Petroleum used well BCU 16-433 as the point to determine distance from wellhead. #14 - Water Resources - The depth to ground water was determined by using static water level data of nearest waterwell (Permit # 280720/ Receipt # 9503230). The reference area is undisturbed ground immediately adjacent and south of the pad as shown in "Looking South" location photos. # 9 – Cultural - All distances listed as 5280 are over 1 mile.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
