Dave,

Per our discussion yesterday, we understand that EnCana is no longer going to submit the voluntary noise limitation as a BMP. We (CDOW) are not going to push that issue as a COA for these EnCana wells at this time. As I mentioned on our call, we are working on a white paper to support noise limitations in areas with grouse. We will revisit this issue when the white paper is completed.

Thanks,

JH

Brian and Jon,

Here's an email I received from Todd of EnCana. Please review and give me a call on my cell 970-309-2514. Thanks.

Dave

Dave, we recently took dosimeter samples from AM #68, AM# 59 and AM #58, and at a 30 ft. radius we read 89-90 dba in our opinion we do not believe we can attain 49 dba even with insulated barriers. Using a decibel comparison chart we found that just normal human conversation ranges from 60-70 db. So it would be virtually impossible, without total removal of these compressor units to attain 49 db.

Sincerely, Todd Zurich
