Subject: Delta Petroleum, BCU Pad 14L, SWSW Sec 14 T9S R93W, Mesa County, Form 2A #400049221 Review

Kallasandra,

I have been reviewing the BCU Pad 14L **Form 2A** (#400049221). COGCC requests the following clarifications regarding the data Delta Petroleum has submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment (OGLA).

1. **Facilities (Section 5):** Form 2A indicates there will be a flare at this location. Construction layout drawings (Sheet 6) and the location drawing (Sheet 1) indicate that there will be a separate flare pit located west of the cuttings pit. This flare pit needs to be marked as a special purpose pit and a Form 15 (Earthen Pit Report/Permit) needs to be submitted. I can make the change if you send an email with this request.
2. **General:** The following condition of approval (COA) will apply:
COA 38 - The moisture content of any drill cuttings in a cuttings pit, trench, or pile shall be as low as practicable to prevent accumulation of liquids greater than de minimis amounts. At the time of closure, the drill cuttings must also meet the applicable standards of table 910-1.
3. **Rule 303.d.(3).C.:** Neither the scaled construction layout drawing (Sheet 6) nor the location drawing (Sheet 1) show the location of the proposed gas and water pipelines. One of these drawings should show the anticipated locations of these new facilities. Otherwise, a statement indicating that the proposed pipeline locations will follow the access road in the comments section would be sufficient. I can make the change if you send an email with this request.

COGCC would appreciate your concurrence with attaching this COA to the Form 2A permit prior to passing the OGLA review. The other issues also need to be addressed prior to permit approval. If you have any questions, please do not hesitate to call me at (970) 625-2497 x5 (office) or (970) 309-2514 (cell), or email. Thanks.

Dave
