### 15. Comments:

#4 – GPS Data: No PDOP reading is available as per Surveyor - Control for survey was established using differentially corrected GPS from an Opus based control network. Well location was established using non-GPS conventional methods, therefore no PDOP reading was taken. #6 - Construction - Delta Petroleum used well NBC 8-133 as the point to determine distance from wellhead. #9 – Cultural - All distances listed as 5280 are over 1 mile. #14 - Water Resources - The depth to ground water was determined by using static water level data of nearest waterwell (Permit # 92801/ Receipt # 9116702).

The reference area is undisturbed ground immediately adjacent and north of the pad as shown in north location photo. I certify that all conditions in the original well permits are the same. There have been no changes to land use or well construction. The site has not been built.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
