It was very minimal contamination, as noted in the photos, and was actually coal fines from Petrogulf activity located just adjacent. Petrogulf cleaned it up. The complainant (Betsey Rocket) is the business partner of Debra Parmenter ie. the whole Petrogulf Florida #17-2 disaster and quite frankly, they both are just a little cranky with industry. I'm having problems accessing COGIS this morning so I can't look at the complaint, but I believe the whole issue was resolved and complaint closed.

Normally small amounts of contaminated soil can be cleaned up without a Form 27. Weeds are not generally addressed in Form 27 either.

Leslie, do you have an estimate of the area covered by the oil or any photos?

Subject: Sunical #1 API#067-05436

Falconer Inc * Vernon – Operator #29200 is resubmitting their financial assurance to 2 individual plugging bonds. After reviewing the operator inspection results it was determined that Sunical #1 is on Fee Surface and will require a surface bond. Can anyone tell me if this surface is on irrigation land or non-irrigation? Also, from the last inspection dated 07/01/2009 there has been a complaint regarding sound levels, weed control and contaminated soil. Does this require a Form 27 Site Remediation Plan?

Please advise.

Thanks,
Martha
