RE: LDS F1-27, 28
Form 27 and Closure Request Cover Letter
API 05-123-29795
Tracking # 1632372
Sec.36 T6N R65W
Weld County, Colorado

Dear Mr. Axelson:

On February 1, 2010, a release of approximately 18 barrels of condensate occurred at the abovementioned location. The release resulted from leaking or partially open valve on an auxiliary tank located near the tank battery. A total of 15 barrels was recovered and transferred from location.

As described in the previously submitted Form 19 neither surface water nor groundwater was impacted. Remediation activities commenced on February 1, 2010. Approximately 19 cubic yards of impacted soil were hauled to the Noble Energy landfarm in Weld County.

The attached documentation includes a completed Form 27, laboratory analytical results from confirmation soil samples, and a site diagram showing sample location and results. Based on the site remedial activities and the attached laboratory analytical results, NEI is requesting that the COGCC consider this location remediated, requiring no further action.

Please contact the NEI environmental department at (970) 785-5025 if you have any questions or require additional information.

Sincerely,

A handwritten signature in black ink, appearing to read 'm. COX'.

Mikel Cox
Environmental Coordinator

A handwritten signature in blue ink, appearing to read 'Marty Faraguna'.
