15. Comments:

Well pad has three wells: existing Camenisch #32-16, API#05-123-23578, staked but not drilled Camenisch #16-32-37R, API #05-123-26083 and Camenisch #16-32-39R, API#05-123-26082. Hydrology map and well location map indicate an irrigation pipe (seasonal) ditch with catchment basin located within 50 feet of the well pad. Drilling on this pad will take place during the winter months, due to the irrigated field and growing season timeframes. BMP will occur during drilling and the irrigation pipe ditch/catchment area will not be impacted.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.

CONDITIONS OF APPROVAL, IF ANY:

All representations, stipulations and conditions of approval stated in this Form 2A for this location shall constitute representations, stipulations and conditions of approval for any and all subsequent operations on the location unless this Form 2A is modified by Sundry Notice, Form 4 or an Amended Form 2A.

Location is in a sensitive area because of close proximity to surface water, therefore, operator must ensure 110 percent secondary containment for any volume of fluids contained at well site during drilling and completion operations.

Operator must implement best management practices to contain any unintentional release of fluids.
