15. Comments:

Depth to Ground water is an estimate. No water was detected during drilling of the present wells nor during construction of the Cuttings Trench. SOP for LE II is to run 40' of conductor and set Surface casing to 12-1500' with cement to surface. The location is inside the City of Rifle's Beaver Creek Municipal Watershed. Laramie II applied for and received a Watershed Permit (No. 04-08) in April, 2009. As part of the COA's Laramie participates in a qtrly sampling and analysis plan for Beaver Creek. Also, Laramie II funded a 24/7 water monitoring facility at the Beaver Creek Inlet for Rifles Municipal Water. The system continuously samples water and can detect all constituents that might reach Beaver Creek in the event of an incident and has automated valves that can close when certain thresholds are met. The Water Shed Permit is Available upon request. Since the City of Rifle is the sole municipality for the Beaver Creek Watershed, no other notifications seem to be required.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
