Lot 2 Sec. 19, Twn. 7S, Rng. 93W 6th PM
Garfield County, CO

Stormwater Management

Stormwater Management will be managed under (Laramie Energy II) LE II's Stormwater Management Plan known as the "Honea-South Leverich Project Area" under CDPHE General Permit No. COR-03E311.

Prior to construction a stormwater "perimeter" will be built around the site for initial work purposes. Once the pad construction is completed, LE II's Stormwater Administrator will inspect the site and install any necessary Erosion Control Devices to manage sediment discharge from the pad. These devices may include but are not limited to:

- Rock Check dams
- Settling ponds
- Straw waddles
- Silt Fencing (used sparingly)

Once the final stormwater Erosion Control Devices are installed they will be mapped in GIS and a diagram of the site will be drafted and included as part of the Stormwater Documentation as required by the CDPHE General Permit.

Each site will be inspected every 14 days and 72 hrs after any major storm event. These inspections will be recorded and documented in the Stormwater Manual onsite and any necessary repairs or modifications will be made and documented.

Spill Prevention Control and Counter Measures(SPCC)

Once the wells are drilled and completed onsite Laramie Energy II's "Helmer Gulch and South Leverich" SPCC plan will be amended to include the site as part of the plan.
