Surface is owned by the Federal Government. This Location Assessment is for expansion of the existing SR 33-9 well pad. There are currently 4 producing wells on the pad. The plans are to drill an additional 13 wells. The location reference point for this location is the existing SR 33-9 well from which all measurements were made. Reference photos will be provided at a later date. Williams will employ the following BMP's to support protection of surface and ground water. 1) Williams will ensure 110% secondary containment for fluids contained at well site during drilling and completion operations. 2) Williams will implement best management practices to contain unintentional release of fluids. 3) A closed loop mud system will be used
