Hannah,

Thanks for checking, and consider this your approval for the surface casing change (after-the-fact).

Dave

Hi David,

I am in receipt of the approved sundry for BAT 13D-17-07-95 re: cement remediation. I will print and record this as the original.

I checked our records to see if a sundry had been filed for the surface casing setting depth and unfortunately I do not believe one was filed. I will re-emphasize to the team that surface casing setting depth increases of 20% or more need to be approved via Form 4 Sundry and make sure that moving forward we watch that more carefully.

Thanks,

Hannah Knopping

Hannah,

The attached Sundry Notice is approved. Please print or save a copy for your records. A hard copy will not follow.

Submit Form 5 with cement tickets and hard copy CBL's for both the primary cement attempt and the remedial cement, as required by Rule 308A.

Did Antero seek prior approval for the surface casing setting depth change from 1000' (approved on APD) to 2307' (actual setting depth shown on your wellbore diagram)? Prior approval is required on a Sundry Notice for a surface casing setting depth increase of 20% or more, as shown on the attached policy.

Thanks,

David D. Andrews, P.E., P.G.
