Sean,

Since there is a problem in receiving an injection permit, what are you preparing to do for mitigation of the contamination source? Extracting water from the interceptor trench to pull the plume back from Grove Creek was approved, but without the injection well, and therefore removal of water from the interceptor trench, please let me know how additional contaminants will be kept from reaching Grove Creek.

This does not need to be a long document, and might even be able to be done via email, as opposed to a formal letter or document, but please include anticipated dates, including when the alternate mitigation plan will be enacted.

Thanks

Just received it. It was sent for 2-day delivery, says the FedEx person. Hence it's arrival today.

Thanks.

Did you mail that CD? I haven't seen it yet.
Please just drop it in the mail if you have not already done so.
Thanks.

Sean,

What is the ETA for the CD containing the electronic version of the NOAV response I picked up last Friday? I cannot do anything with paper in our system, so am awaiting receipt of the CD. The document does not have to all be in one huge pdf; it can be in a pdf per appendix or in two or three pdfs total. But, I do need it electronically as I do not have a reasonable way to turn paper into electronic versions.

Please let me know.

Thanks
