15. Comments:

Nearest surface water isn't visible on the COGCC topo map nor on the aerial map due to agricultural recontouring. As shown on the hydrology map there are two "water holes" which were used for distance to surface water. Nearest WW in Sec 14 (permit 94826) was used for distance and static water level. Sensitive Area was ckd because the location is in the Upper Crow Creek Designated Groundwater Basin.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
