Subject: Williams Production RMT, Cuttings Trench GR 14-28, Lot 10 Sec 28 T6S R96W, Garfield County, Form 2A (#400086004) Review

Greg,

I have been reviewing the Cuttings Trench GR 14-28 **Form 2A** (#400086004). COGCC would like to attach the following conditions of approval (COAs) based on the information and data Williams RMT has submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment (OGLA) review.

1. **General:** Due to the potentially permeable nature of the surface material in this area, the following conditions of approval (COAs) will apply:
 - COA 38** - The moisture content of any drill cuttings in a cuttings pit, trench, or pile shall be as low as practicable to prevent accumulation of liquids greater than de minimis amounts. At the time of closure, the drill cuttings must also meet the applicable standards of table 910-1.
 - COA 46** - The location is in an area of high run off/run-on potential; therefore the pad shall be constructed to prevent any stormwater run-on and/or stormwater runoff.

Based on the information provided in the Form 2A by Williams, COGCC will attach these COAs to the Form 2A permit, Williams does not need to respond, unless Williams has questions or concerns with details in this email. If you have any questions regarding this email, please do not hesitate to call me at (970) 309-2514 (cell), or email. Otherwise I will assume that these changes, requests, and COAs are acceptable to Williams. Thanks.

Dave
