15. Comments:

#1 Consultation: Since this location is in a "Sensitive Wildlife Habitat Area" and is subject to the Wildlife Mitigation Plan that Antero negotiated with CDOW (see attached Proposed BMP list which includes summary of WMP). #4- The proposed BAT 12B-24-07-96 well location was used as the reference point for well distance measurements. #6: The disturbed area acre amounts include the access road. #14 The depth to ground water was determined by using static water level data of nearest active water well (Permit#274330/Receipt#9502816). Distance to nearest surface water was given for a perennial stream found on topo map (see attached Hydrology Map). Our reference area is undisturbed ground immediately adjacent and to the west of the well pad, as shown in the "West" location photo.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
